

Screensaver Installation Instructions:

- If you have a copy of our previous screensaver, or your changing the resolution of the screensaver, first run the saveramic uninstall program: 'SaveramicRemove.exe' located in the root of the screensaver folder.
- Go to the Windows directory and remove the previously installed images manually by highlighting and deleting them.
- Now you may proceed as for a new installation.

New Installation:

- Create a folder on a local drive in your computer, E.G.: 'C:\Program Files\Screensaver'
- Use a program to extract the screensaver files (such as Winrar or Winzip) into the folder you just created.
- Execute 'Setup.exe' located in the root of the folder you just extracted the screensaver files to.
- Choose the images you want installed and complete the installation.

To Change the Settings or Images that are displayed:

- Right click on your desktop background area, and choose 'properties'.
- Click the 'Screen Saver' tab, ensure 'Saveramic' is picked as the Screen saver, then click 'Settings'.
- Panoramic Screen Saver Options will open and you can add or remove pictures and change other program options.
- Click Ok to exit.

Note: There are no thumbnails with this version of the screensaver.
